

SOLID ABRASIVE COMPOUNDS

3674 BROWN/ROBOT 2004

to polish and bright finish with robot units: recommended on brass pieces (taps and faucets); in particular suitable for high climate temperatures

available in DRY version (i.e. the compound is drier than normal version)

with sisal+cotton buffs, natural and impregnated; with natural and treated cotton buffs semi-bright finish can be achieved

3675 BROWN/ROBOT 2006

to polish and bright finish with robot units: recommended on brass pieces (taps and faucets); in particular suitable for high climate temperatures

2006 version is more cutting that 2004

with sisal+cotton buffs, natural and impregnated; with natural and treated cotton buffs semi-bright finish can be achieved

3612 GIALLA SUPER

to polish and bright finish: aluminium, zamac and brass

with sisal+cotton buffs and cotton buffs

3653 WHITE ROBOT 97

to pre-polish and polish: aluminium, zamac, brass and all metals in general

with sisal and sisal+cotton buffs, with natural and treated cotton buffs

3624 BIANCA/S 181

to bright finish: brass

with cotton buffs

3641 ROSA NEW BRASS

to bright and mirror finish: zamac and in particular aluminium and brass

with cotton buffs

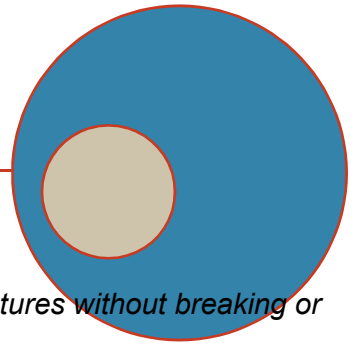

3640 P/707 LEOPARD

to polish and bright finish at the same time: aluminium, zamac, brass.

Very fine product with cutting abrasive power; it gives a very homogeneous finish, allowing a deep final chromium plating

with cotton buffs

3664 BLACK ACE

Aluminum oxide cutting compound, good cutting and can withstand high temperatures without breaking or melting.

3663 BLACK ACE DRY

Even higher heat resistance. Excellent for working on polishing machines or robots without breaking or melting. Ideal from June to September.

3647 WHITE IRON 41

*to pre-polish and polish: all metals
with sisal and sisal+cotton buffs, with steel wire brushes*

3615 BIANCA MILLENIUM

*to polish: all metals in particular stainless steel and brass; suitable for internal and external parts of sinks, tableware
with sisal and sisal+cotton buffs, natural and with impregnation, extremely good with steel wire brushes too*

3631 BIANCA INOX

*to polish and bright finish: all metals in particular iron
with sisal and sisal+cotton buffs, natural and with impregnation, with cotton buffs and with steel wire brushes*

3646 BLU INOX 38

*to polish and bright finish: all metals, recommended on aluminium; fine cutting
with sisal and sisal+cotton buffs, natural and with impregnation, with cotton buffs*

3657 HERCULES

*to polish and bright finish all metals, particularly suitable for brass, castings and stainless steel
with sisal+cotton buffs, natural and with impregnation, with steel wire brushes*

3611 NERA INOX

*to polish and bright finish: stainless steel
with sisal and sisal+cotton buffs, natural and with impregnation*

3636 AZZURRA/N

*to bright and mirror finish: all metals, in particular iron and zamac
with natural and treated cotton buffs, with woollen cloth buffs*

3645 AZZURRA/94

*to bright and mirror finish: all metals, in particular iron, zamac and stainless steel
with natural and treated cotton buffs, with woollen cloth buffs*

3668 BLU STAR

*to mirror finish all metals
with cotton buffs*

3640 P/707 LEOPARD

*to polish and bright finish at the same time: aluminium, zamac, brass.
Very fine product with cutting abrasive power; it gives a very homogeneous finish,
allowing a deep final chromium plating
with cotton buffs*
